

Strategic Consulting

Decision Inc. 2018 - present

Operating Model

I led a long term engagement with a transport company to review and redesign their current operating model. This included a revised IT strategy and cost options.

Value add – Logistics Company

I led a project for a private equity house to review the operations of one of their holding companies to understand why returns were not achieving the investment case.

Corporate Integration

I led the benefits realisation and back office integration teams for the merger of Sibanye and Aquarius mining company, this role entailed the creation, validation and management of a various work streams across two companies into a single operating model.

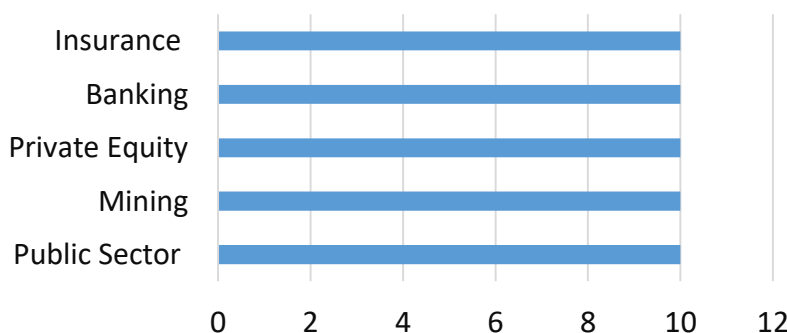

Corporate Cost Optimisation

I led 5 different cost optimization projects for 4 mining and 1 FMCG client. This entailed running a project teams of 15 staff to perform detailed review of client operations to identify sustainable cost reductions.

Project Management

I established and led the PMO office for the back office transformation of an African diamond mining company. This project entailed the identification of areas for improvement as well as managing the project through implementation to ensure that identified benefits were achieved
