

Michael Martin

Client Partner

I am the manager within the Data, Information and Analytics team with a background in data analysis and project management.

I have over 10 years of corporate experience including 4 years in the consulting space.

I completed my BComm while acting as the Project Accountant within the IT EPMO for one of the largest banks in Africa.

Data Management & Advanced Analytics

Decision Inc. 2015 - present

I am the Manager of the Data Management and Advanced Analytics team consisting of 20 Business Intelligence consultants. I manage and provide oversight for over 10 projects across multiple clients. My current portfolio has me partnering with up to 10 clients across multiple industries.

Internally, I focus on the Development/Career Plan for individual team members as well as expanding the division to allow for new skillsets which allow my team members the ability to successfully assist my clients in their strategic data goals.

I actively engage with clients, understanding their goals and requirements and assist in setting up new projects or aligning the appropriately skilled resource for any of their resourcing needs.

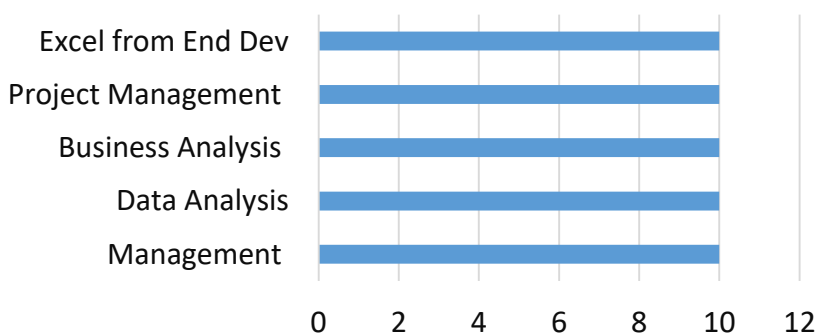

I take full accountability for all client projects and demand superior project quality and the impact thereof, all while ensuring initiatives deliver on the expected ROI.
