

SAP Business Data Cloud

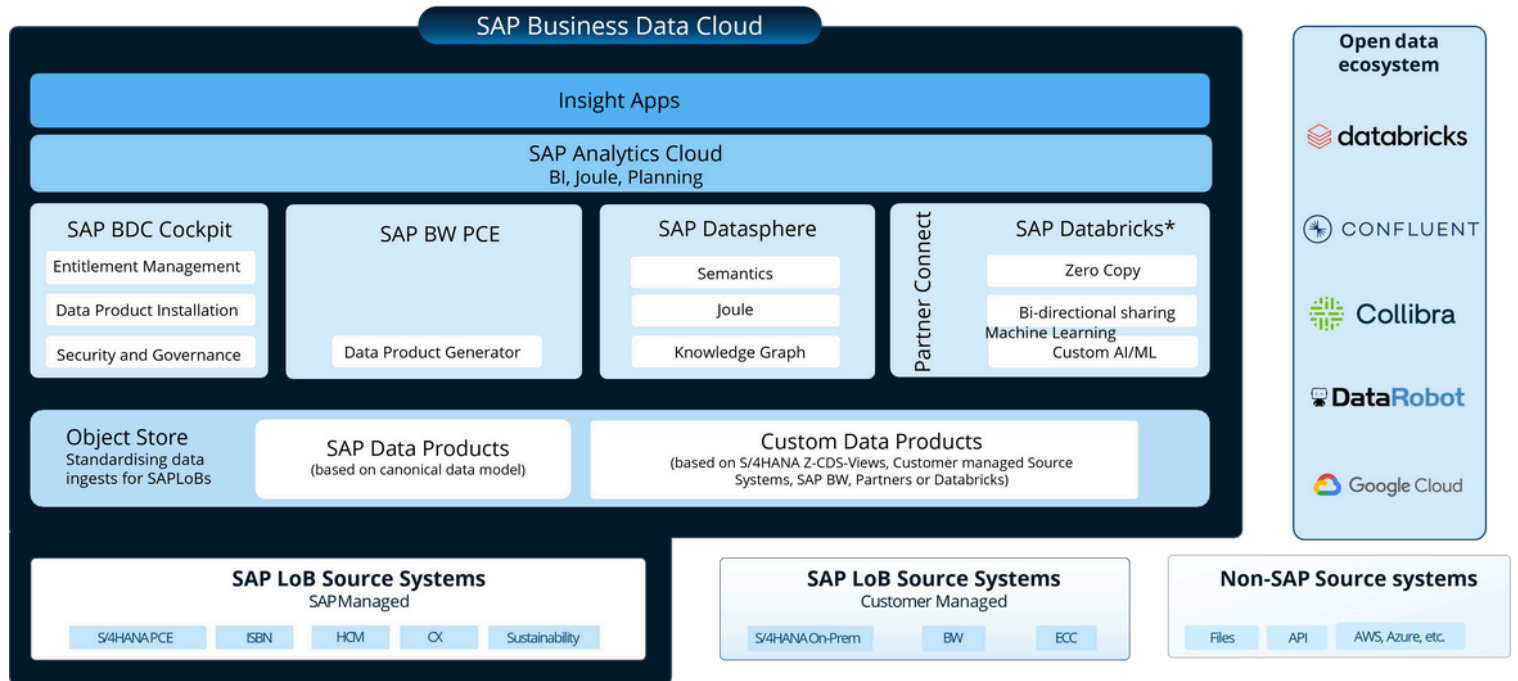

The Future of Enterprise Data Management and AI is Here

By **2027**, AI assistants and AI-enhanced workflows incorporated into data integration tools will reduce manual intervention by **60%** and enable self-service data management.

Gartner

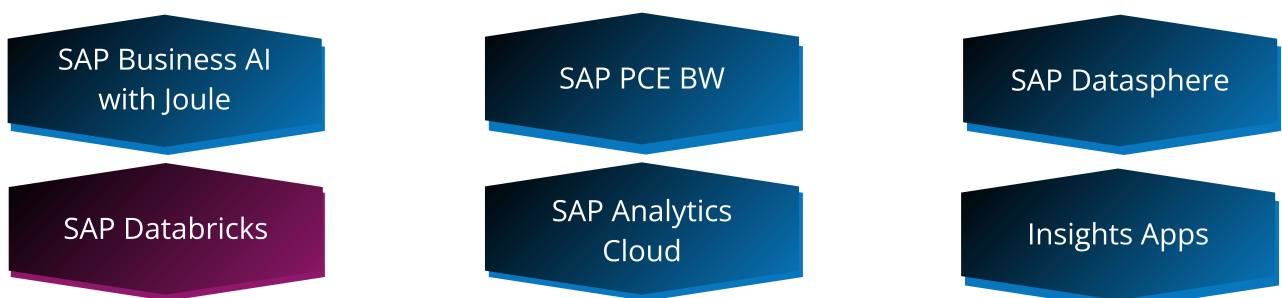

TRANSFORMATIVE INSIGHTS FOR SMARTER DECISIONS

SAP Business Data Cloud is a fully managed SaaS solution that unifies and governs all your SAP and third-party data, providing line-of-business leaders with the context needed to make impactful decisions. By leveraging tailored, prebuilt applications, you can unleash transformative insights that drive your business forward.

SAP Business Data Cloud establishes a harmonised data foundation, enabling customers to unleash Business AI across all their data.

As an evolution of our industry-leading data, planning, and analytics solutions, **Business Data Cloud** brings together the below SAP products with a unified experience that delivers transformational insights across all lines of your business.

KEY BENEFITS

01

Unified Data Platform: Connect all your SAP and third-party data seamlessly, eliminating data silos and ensuring consistent, accurate information across your organisation.

02

Powerful Insight Apps: Deliver transformational insights for advanced analytics and planning with prebuilt applications across all lines of business.

03

AI with Context: Create a trusted data foundation for production-ready AI that is reliable, responsible, and relevant. Ground AI in your business data to automate essential tasks and explore possible outcomes with advanced simulations.

SAP DATABRICKS PARTNERSHIP

SAP and Databricks have joined forces to deliver a powerful new partnership that unifies **Enterprise Data** and accelerates **AI-driven** innovation. With seamless integration between **SAP and the Databricks Data Intelligence Platform**, businesses can now connect and enrich their data across landscapes, build advanced machine learning models, and unlock deeper insights-all while maintaining strong data governance and scalability. This collaboration marks a significant step forward in helping organisations turn data into real business value.

TOGETHER, SAP AND DATABRICKS ARE REDEFINING WHAT'S POSSIBLE WITH DATA.

DECISION INC.

BUSINESS VALUE

Productivity at Scale:

Eliminating manual data work lets your business focus on high-value, growth-driving activities.

Accelerated Decision-Making:

Make faster, more confident decisions in dynamic markets with high-quality data and built-in business context.

Cross-Functional Alignment:

Enable cross-functional teams to collaborate on a shared, trusted data foundation-reducing risk from misaligned insights.

Stronger AI & Predictive Capabilities:

Boost AI impact with real-time business data for smarter forecasting, planning, and automation.

Reduced Total Cost of Ownership

Streamline data management by unifying tools, cutting integration costs and complexity.

Future-Proof Infrastructure:

With SAP Databricks integration, the platform evolves with new technologies-enabling secure, confident innovation.

ACCELERATE AI WITH DATABRICKS INTEGRATION

We have been a trusted SAP partner since 2007 and is one of South Africa's leading and most innovative Databricks partners. Our deep expertise in AI and machine learning helps businesses go beyond data storage - unlocking real, measurable value from their data. Backed by a growing team of data specialists, we turn complexity into clarity and insight.

Decision Inc. is a specialist technology partner across the key technologies of the SAP Business Data Cloud offering.
