

# DECISION INC. GET AI-READY WITH MICROSOFT FABRIC

Build a Production-Ready AI Data Platform in 4 Weeks

Microsoft Fabric

Microsoft

## Unify your data estate

## Accelerate insights

## Enable AI

GenAI and advanced analytics are boardroom priorities. Organisations that fail to modernise risk falling behind peers already using AI to grow revenue faster and capture market share. Microsoft Fabric provides a unified data platform to enable AI and analytics at scale – fast.

## WHY MICROSOFT FABRIC?

AI project success depends on the quality, structure, and readiness of your data. Setting up an AI-ready data platform can be complex, resource-intensive, and often underestimated.

Decision Inc. removes these barriers by **partnering with your team** to stand up a production-ready Microsoft Fabric environment. We accelerate adoption by configuring cloud infrastructure, managing licensing, integrating your first key data source, and training your team.

Microsoft Fabric simplifies AI adoption by creating a single, trusted data foundation, so your organisation can focus on insights, not infrastructure.

“Organisations **leading in AI** have experienced **1.5 times faster revenue growth** compared to their peers.”

- OpenAI, *Staying Ahead in the Age of AI, 2025*

“Organisations using Microsoft Fabric have achieved up to **379% ROI** and a **25% increase in data engineering productivity**.”

*Forrester's Total Economic Impact™ (TEI) study on Microsoft Fabric*

### TRADITIONAL DATA PLATFORM

- Built for structured data and historical reporting
- Batch processing, dashboards, KPIs
- Reliable, but limited for AI/ML use cases

### AI-READY DATA PLATFORM

- Unifies structured, semi-structured, and unstructured data
- Scales for real-time analytics, ML, and GenAI
- Enables predictive, adaptive, and AI-driven decision-making

Don't let traditional data platforms limit your AI potential.

DECISION INC.

## OUR PARTNERSHIP APPROACH

We do not just implement technology; we partner with your team from start to finish. Together, we will:

- ➔ **Configure Your Environment:** We work side by side to set up your cloud environment, manage licensing, and prepare your platform for AI success.
- ➔ **Integrate Key Data:** Connect a key business data source to start generating insights.
- ➔ **Enable Your Team:** Equip developers, data engineers, and business users with the knowledge and tools to operate and scale the platform.
- ➔ **Roll Out with Confidence:** Launch a production-ready platform with your team empowered to own and expand the solution.

## 8 STEPS TO A PRODUCTION-READY MICROSOFT FABRIC ENVIRONMENT

## BY THE END OF WEEK FOUR

You will have a secure, production-ready Microsoft Fabric environment that will consolidate your data and establish a strong foundation for AI and advanced analytics. Benefits include:

Accelerated AI adoption

Reduced trial-and-error in AI initiatives

Future-proofed data strategy

Faster, more confident business decisions

Want to strengthen governance, security, and operational efficiency while preparing for AI adoption at scale

## WHO WILL BENEFIT?

This Microsoft Fabric AI Accelerator is ideal for organisations that:

- Want to unlock AI-driven business value quickly
- Need to reduce time-to-insight and accelerate decision-making with AI-ready data pipelines
- Aim to modernise their data platform for generative AI, machine learning, and advanced analytics use cases
- Seek to consolidate siloed or duplicated data into a single source of truth
- Want to strengthen governance, security, and operational efficiency while preparing for AI adoption at scale

## WHY WORK WITH DECISION INC.?

Decision Inc. is a global digital consulting firm helping businesses adapt, grow, and succeed in a rapidly evolving world. For over 15 years, we've partnered with more than 400 clients to modernise their operations and better leverage technology.

Our team combines deep industry knowledge with technical expertise to deliver practical, scalable solutions — whether through strategy, systems design, or data-driven insights. With offices across four regions, our consultants work in cross-functional teams spanning consulting, development, and engineering, all focused on delivering real value and keeping clients at the centre of what we do.
